

**Australian and New Zealand Bone and Mineral Society
Advanced Clinical Postgraduate Meeting 2013**

Saturday 11 May 2013

Education Centre, Royal Brisbane and Women's Hospital, Brisbane, Queensland

With the ageing Australian population, it is more important than ever that specialists working in a variety of disciplines - from endocrinology to rheumatology, general medicine, respiratory medicine, rehabilitation, geriatric medicine, and (not surprisingly!) orthopaedic surgery - are confident and skilled in managing common bone diseases.

The Australian and New Zealand Bone and Mineral Society invites you to attend the 2013 Advanced Clinical Postgraduate Meeting in Bone Disease.

Topics to be covered

- Basic bone biology
- How to diagnose osteoporosis? Who is at risk?
- Osteoporosis treatment options: why treat, whom to treat, when to treat and with what?
- Bone turnover markers: what are they and are they useful in clinical practice?
- Controversies in OP management: how to use our armamentarium effectively, efficiently and safely – somewhere after whom to treat, with what, etc
- Vitamin D deficiency: a disease of our own making?
- The calcium controversies
- DXA scanning: using this tool with sophistication
- Glucocorticoid-induced osteoporosis
- Back pain: an approach for non-rheumatologists
- Osteogenesis imperfecta: what to do?

Faculty to include

- A/Professor Emma Duncan
- Professor Peter Ebeling
- Professor Rebecca Mason
- Dr Don Perry-Keene
- Dr Allison Pettit
- Dr Philip Robinson
- Professor Markus Seibel
- Dr Joseph Wong
- A/Professor Rory Clifton-Bligh
